**FEBRUARY 14,
2024**

The Network Colonial Contexts was founded in 2020, and includes provenance researchers, scholars from social and cultural anthropology, history, political science, and art studies, and experts on digitization in science and culture. They represent about 50 different institutions, such as libraries, archives, museums and university collections, research funding and infrastructure institutions.

The aim of the meeting is to introduce the diverse and heterogeneous structural contexts in Germany, i.e. federalism, private and public funding organizations as well as individual programs that enable project participation or application by international project partners. On the one hand participants will get the chance to learn about research tools in German institutions, museums, archives and on the other hand get an overview of the German funding landscape.
